QUESTION

25X1 CIA plans to move personnel into leased space [] even
25X1 before the new building on the CIA compound at Langley is occupied. Why does
the CIA require space at []

RECOMMENDED REPOSE:

25X1 CIA needs additional space to consolidate a majority of our personnel and
activities that can not be accommodated on the Headquarters compound. When we
originally designed the new building in 1980, we planned to consolidate most
of our Washington area work force then scattered in [] dispersed buildings in
the Washington area on the Headquarters compound to improve efficiency,
productivity, and security. We were unable to accomplish that goal, however,
because of the substantial growth since 1980 in our work force and our
requirements for special use space for computers, communications equipment and
printing facilities. When we begin moving into the new building later this
25X1 year, we will be scattered in [] buildings, compared to [] in 1980. When we
25X1 complete the move, we will still be dispersed in [] buildings, not much of an
improvement over our situation in 1980.

25X1 Given this situation, in 1986 we again sought a way to improve efficiency,
productivity, and security by bringing our workforce together in four
geographic areas []

25X1 []
25X1 [] We found the latter in an opportunity to take over an
25X1 existing lease [] provided
two existing buildings that meet many of our security and special use
25X1 requirements [] where additional buildings could be
constructed.
